STROKE SPECIAL INTEREST GROUP

Academy of Neurologic Physical Therapy

In this newsletter...

- Evidence Elevates, National Campaign, new podcasts
- stroke SIG, Podcast #18
- Cerebellar Stroke Course, ANPT Education Center
- ANPT Annual Conference
- Ask the expert!!

Podcast 2. **No Easy Feat: 3 clinicians use evidence to change their practice**

In this episode, physical therapist Mina Tialino and occupational therapists Steve Wallenfels and Philip Lamoreaux share stories of how they and their inpatient rehabilitation team have transitioned away from using traditional therapies in the care of their patients with neurologic conditions. Learn how these therapists with different levels of clinical experience have infused evidence-based approaches to promote positive outcomes and empower their patients!

Podcast 3. **Spreading the Evidence: Integrating Evidence into Practice**

In this episode, physical therapist and clinician, Jonathan Kinzinger, shares his story of finding evidence that he could apply to practice. Resources such as the Clinical Practice Guidelines for the core outcome measures and locomotor training inspired him to change practice. He is now embarking on systematic change.

The Stroke Special Interest Group and Assistive Technology/Seating and Wheeled Mobility

Cerebellar Stroke Course

This course will provide a review of the anatomical structures of the cerebellum and its vasculature, information on the pathophysiology and etiology of cerebellar stroke, as well as the prevalence and prognosis. Differential diagnosis of acute manifestations of cerebellar stroke will be included. The speakers will cover distinctive impairments of cerebellar stroke in addition to the development of appropriate treatment strategies.

Learning Objectives:

1. List specific roles and functions of the cerebellum.
2. Compare characteristics of various cerebellar stroke syndromes.
3. Describe typical impairments associated with cerebellum damage.
4. Choose assessments and outcome measures appropriate for cerebellar pathology.
5. Select treatment strategies for cerebellar stroke rehabilitation.

Course Launched June 2022
